

Plans & Offerings

Monthly Retainer Plans (more than the Corporate plan)

For clients with recurring needs, I offer discounted monthly retainer packages.

- \$1200/month - up to 40 hours (effective rate: \$30/hour)

This option is ideal for long-term projects, ongoing maintenance, or when you need a reliable backend partner without the overhead of hiring full-time.

Timezone Flexibility

I am flexible with working hours and can adjust to match timezones in:

- North America (EST, PST)
- Europe (CET, GMT)
- Australia (AEST)

I ensure overlap for collaboration and quick response, especially during project-critical windows.

Fast Turnaround & Clear Communication

I prioritize clear communication and fast delivery without compromising quality. Clients benefit from:

- Detailed progress updates
- Quick issue resolution
- Transparent reporting

Collaboration Style

I prefer working closely with product owners, designers, and teams to understand goals clearly.

Tools I'm comfortable with:

- Trello, Jira, Slack
- GitHub/GitLab
- Zoom/Google Meet/Teams

Let's Build Together

Let's build scalable, secure, and elegant software -' together. Whether you're a startup, agency, or enterprise, I bring backend craftsmanship, attention to detail, and performance-driven code to your project.
